Dear Pharmacists,

Training Subsidy Scheme for Pharmacists
to Support Primary Healthcare Development in Hong Kong

The Government is committed to the development of primary healthcare in Hong Kong through strengthening the primary healthcare workforce and training for healthcare professionals. According to the Primary Healthcare Blueprint launched in December 2022, it is aimed to progressively enhance the role of community pharmacists in the delivery of primary healthcare services. As such, it is necessary to bolster the professional and clinical skills and practices of pharmacists before engaging in the provision of designated primary healthcare services in Hong Kong.

The **Certificate Course in Primary Healthcare for Pharmacists** (the course) organised by the Department of Pharmacology and Pharmacy of the Li Ka Shing Faculty of Medicine of The University of Hong Kong (HKUMed) provides essential knowledge and skills to registered pharmacists in Hong Kong for achieving quality services in community healthcare setting. The course will be commenced in March 2024 and is now open for application. For the course details, please refer to the Annex.

As an incentive for enrolment, the Government will provide subsidy to participants who have successfully completed the course. The participants having satisfied the course requirements and being awarded with the certificate of the course may apply to the Health Bureau for reimbursement of **HK\$3,280** within 6 months of award. Applicants shall not obtain any other public funds or assistance under any other publicly funded financial assistance scheme for the fees to be reimbursed for the same course. The final approval of the reimbursement is at the discretion of the Government.

We look forward to your active participation. Should you have any enquiries related to the training subsidy, please feel free to contact us at 2205 2473 or by email at pho@healthbureau.gov.hk. Thank you.

Yours faithfully,

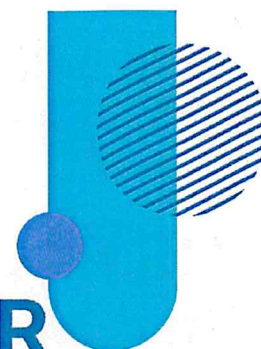

(Dr PANG Fei Chau)

for Secretary for Health
